

Community Integration

The **Community Integration Suite** is based on years of research and experience developing technology to support organization and memory. Independence at home, work, school, or in the community is a reality with calendar reminders and multimedia support for important tasks and to-do lists. An optional picture-based cell phone ensures extra confidence and safety.

Community Integration Suite

Discovery Desktop
straightforward program access

Schedule Assistant
audio/picture schedule reminders

Visual Assistant
multimedia step-by-step instruction

Pocket ACE
*Optional Upgrade
visual phone

For people with Intellectual and Developmental Disabilities, our research shows significant gains in independence when technology is used as a natural self-directed support. The Community Integration Suite is an excellent tool for helping to fade the presence of a job coach or life skills instructor.

People with Intellectual and Developmental Disabilities often require human support to complete a wide range of daily living tasks at home, school, in the community or at work. But research has shown the potential of multimedia devices to reduce support costs and foster greater independence.

Now, there is the Community Integration Suite from AbleLink Technologies. While simplifying program navigation, personal scheduling and task instruction, the Community Integration Suite runs on a standard Windows Mobile PDA and is a discreet, portable system for self-managing daily activities.

- Schedules and calendar reminders
- Step-by-step instruction for important personal care, vocational, and educational tasks
- cell-phone (optional)

Minimum Pocket PC Requirements for CIS
